Education

Bachelor of Science in CSE

BRAC University

Jan 2022 – Dec 2025

CGPA: 3.5

A Levels

Academia

Jan 2019 – Jun 2020

Result:

Chemistry – A*, Physics – A,
Mathematics – A

O Levels

Academia

Jun 2017 – Jan 2018

Result:

Chemistry – A*, Physics – A,
Mathematics B – A*,
Mathematics A – A*,
Pure Mathematics – A*, Bengali – A*,
English – B

Technical Skills

Web: HTML5, CSS3, JavaScript,
TypeScript, ReactJS, VueJS

Backend: PHP (Laravel),
NodeJS, Java, Python

Data/DevOps: MySQL,
MongoDB, Git, Linux

Digital Literacy: Microsoft Word,
Excel, PowerPoint

Language

English
Bengali

Profile

CSE Graduate from BRAC University with a proven track record of managing complex technical projects and a 6-year background in private mentorship. Demonstrated ability to simplify complex concepts by tutoring 8+ students from primary to A-Levels, fostering analytical thinking and disciplined work ethics. Eager to leverage strong communication skills and technical proficiency in a challenging software engineering role.

Thesis

Gamified Secure Coding Platform (MERN Stack) BRAC University

- Designed and developed a full-stack secure coding platform utilizing MongoDB, Express.js, React, and Node.js built around the Octalysis framework to mitigate critical web vulnerabilities like SQLi and XSS.
- Conducted qualitative research through 32 semi-structured interviews with industry software professionals to target core development knowledge gaps and learning behaviors.
- Evaluated framework via the MEEGA+ model with 30 participants, yielding a “Good Quality” rating and an IRT score of 60.11, statistically validating gamification efficacy in technical security training.

Projects

Locally Running AI-Agent (Second Opinion Doctor)

- Developed a local artificial intelligence assistant engineered to systematically process patient inputs and generate medical second opinions.

Tetris Game

- Built a feature-complete replica of the classic Tetris game applying core graphics programming and object-oriented architectural patterns.

Car-Workshop Management System

- Architected a specialized management system to streamline workshop operations, mechanics scheduling, and comprehensive auto-service tracking.

Online Tech Shopping Website (Kinba)

- Engineered a functional e-commerce platform optimized for browsing, filtering, and purchasing consumer technology components.

Student Management System

- Built a web application allowing educational institutions to securely organize student profiles, academic metrics, and course logistics.

Achievement

- Academia High Achievers Award -2018
- 20th Daily Star award for Excellence in O level result (2019)
- 22nd Daily Star award for Excellence in A level result (2021)
